

Comparison of Soil Test Labs

4/15/2022 Update

General Information

- ASSUME PAYMENT MUST BE INCLUDED WITH SAMPLES.
- Organic matter (OM) is an important soil property to track, but it is not offered in some basic packages. Producers are advised to request OM even if they choose a lab that charges an additional fee for the information.
- Soil texture analysis is not offered by many labs in their basic packages. If labs do offer the analysis for a separate fee, it is often very expensive. Soil texture of the dominant map unit in a field can be obtained from Web Soil Survey.
- Soil sampling depth should be 8 inches.
- There is no need to request recommendations from the soil test labs.
- Most labs have order forms and price lists on their website.
- A new soil characteristic called the **Degree of Phosphorus Saturation** or **DPS** will be required on fields where phosphorus-bearing nutrient sources are intended and soil test phosphorus is equal to, or greater than, 150 FIV. Some labs already provide DPS as part of their basic packages while others do not. Consult the right column of the table below for information on acquiring DPS or the necessary information for calculating it.

Waypoint Analytical Virginia, Inc. 7621 Whitepine Road Richmond, VA 23237 Phone: 804-743-9401 www.waypointanalytical.com	\$10.00 (Mehlich-3) \$1.50 for Al and \$1.25 for Fe	<u>S1M Package</u> OM, P, K, Ca, Mg, pH, buffer pH, CEC, % base saturation of cations <u>Al & Fe</u> - required for high P soils to determine DPS for UM-PMT	Several micronutrient combinations are also available. Contact Waypoint for more information.	Al and Fe can be requested for an additional \$2.75 per soil sample. <i>NuMan Pro 4.2 (and later)</i> can calculate DPS when soil test includes Mehlich-3 Fe & Al.
Waypoint Analytical Pennsylvania, Inc. 280 Newport Road Leola, PA 17540 Phone: 717-656-9326 or 1-800-464-6019 www.waypointanalytical.com	\$10.00 (Mehlich-3) \$12.50 (Mehlich-3) \$1.00	<u>S1M Package</u> P, K, Ca, Mg, pH, buffer pH, CEC, % base saturation of cations <u>S2M Package</u> P, K, Ca, Mg, pH, buffer pH, CEC, % base saturation of cations, plus 2 trace minerals (select Fe & Al – required for high P soils to determine DPS for UM-PMT) <u>OM</u>	Several micronutrient combinations are also available. Contact Waypoint for more information.	OM is not included in standard test package. If desired, OM must be requested for an additional \$1.00/sample. Al and Fe may be selected as the ‘two trace minerals’ that may be added in the S2M analysis. <i>NuMan Pro 4.2 (and later)</i> can calculate DPS when soil test includes Mehlich-3 Fe & Al.
